RE: TVM Litigation – Imaging problems with production 124
Our file: 430-2000

Dear Ms. Sutherland:

I am writing regarding imaging problems with production 124. Approximately one third of this production is unreadable due to obscured or overlaid text throughout the documents. The documents will have to be reproduced to us in a readable format as soon as possible. We will need to have them reproduced no later than May 31, 2012, as many of these documents will be required for the 30(b)(6) deposition that is scheduled to continue on June 4 and 5. I note that we have also encountered similar issues with productions 122 and 123, but I will address those issues under separate cover. The bates numbers for the documents from production 124 which have imaging problems appear below:

ETH.MESH.08443314
